HeLa QC Dashboard — HeLa Lysate110926

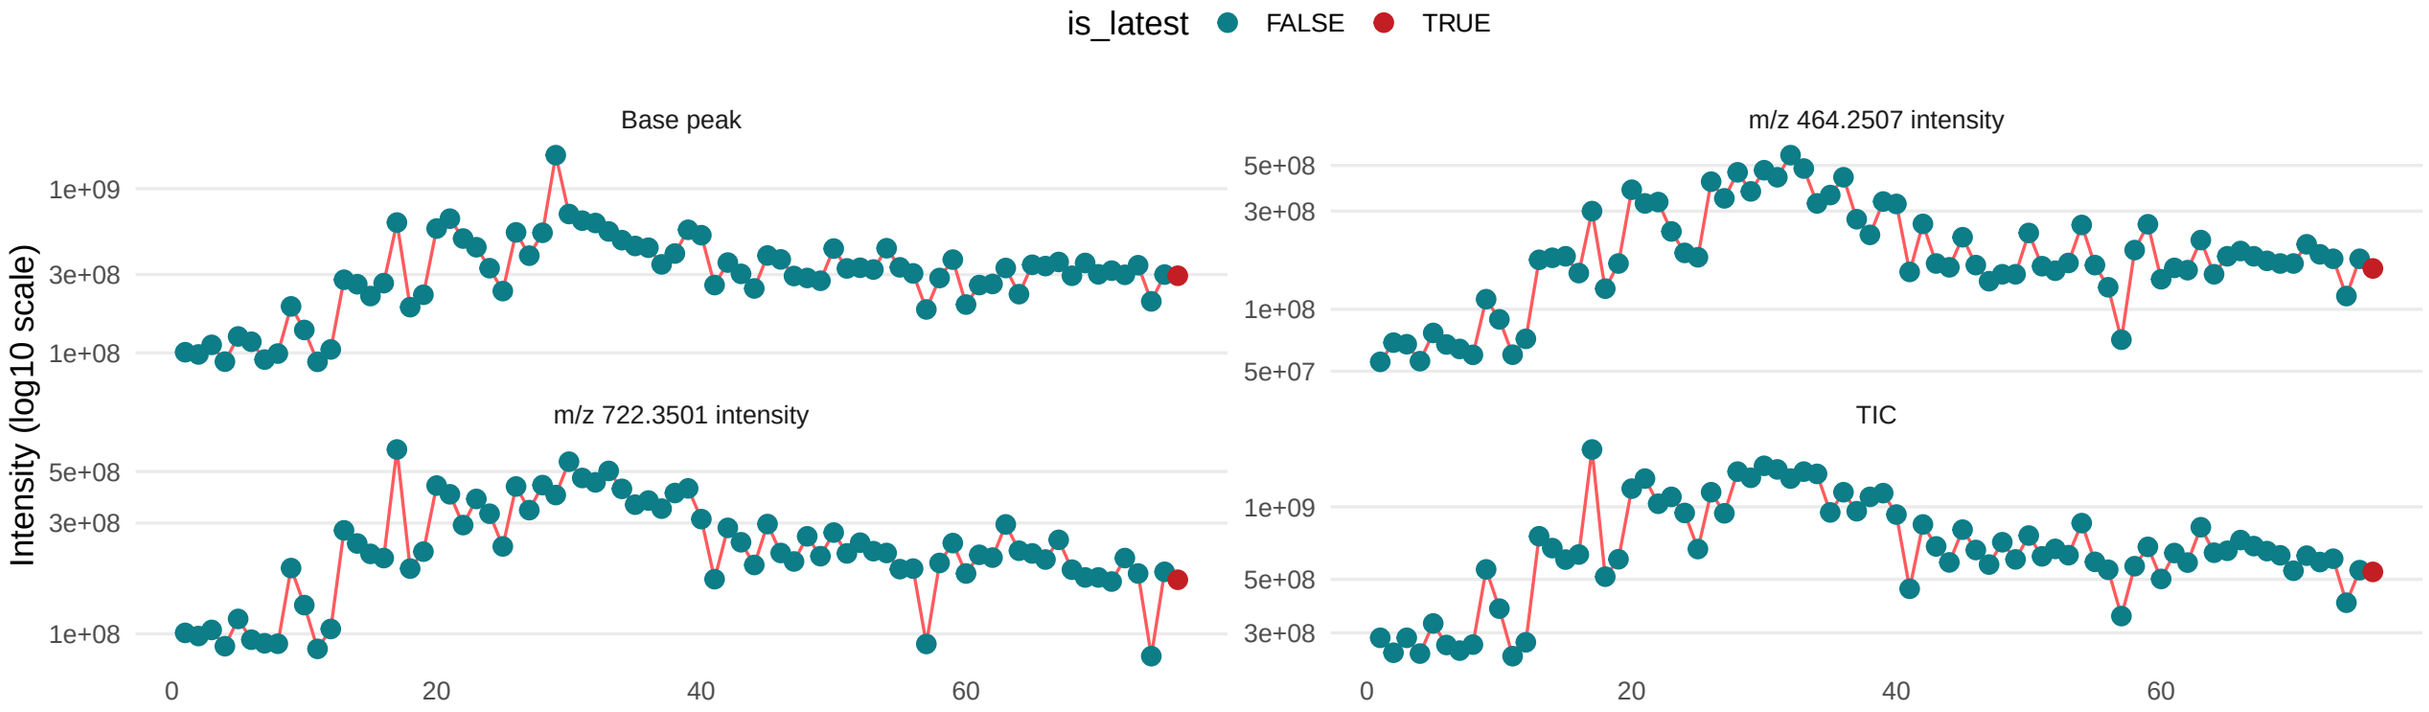

Pump pressure

Tracks LC health (clogs, leaks, column changes)

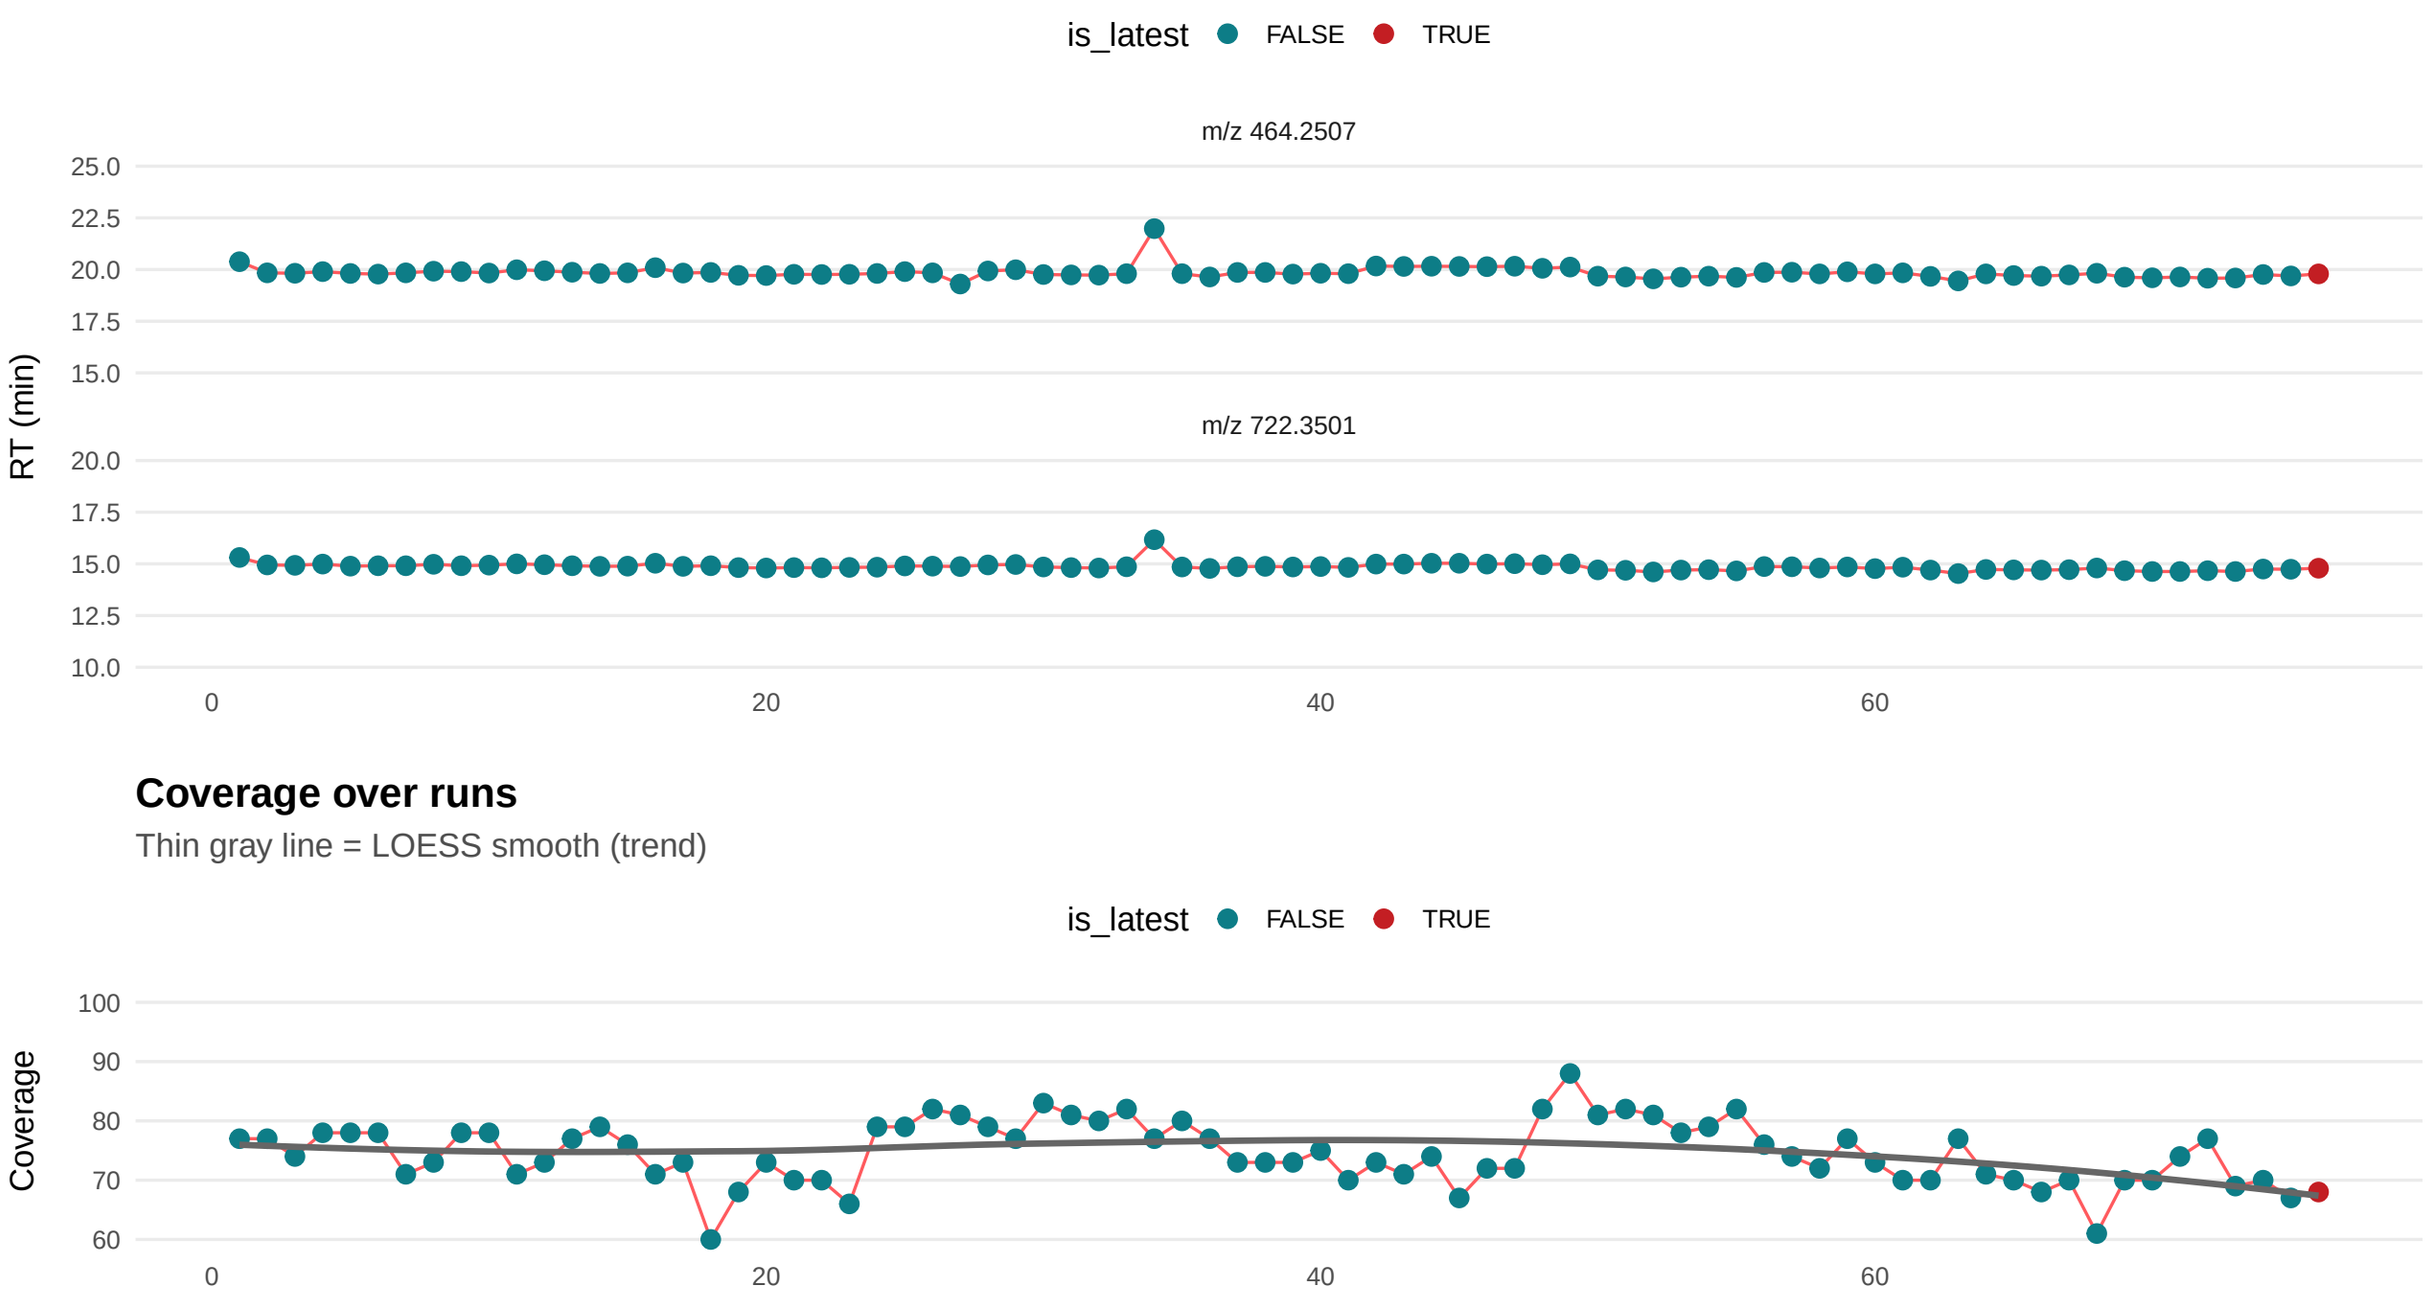

Signal stability (log scale)

TIC, base peak, and key ion intensities

Retention time stability

Per−ion RT drift across runs

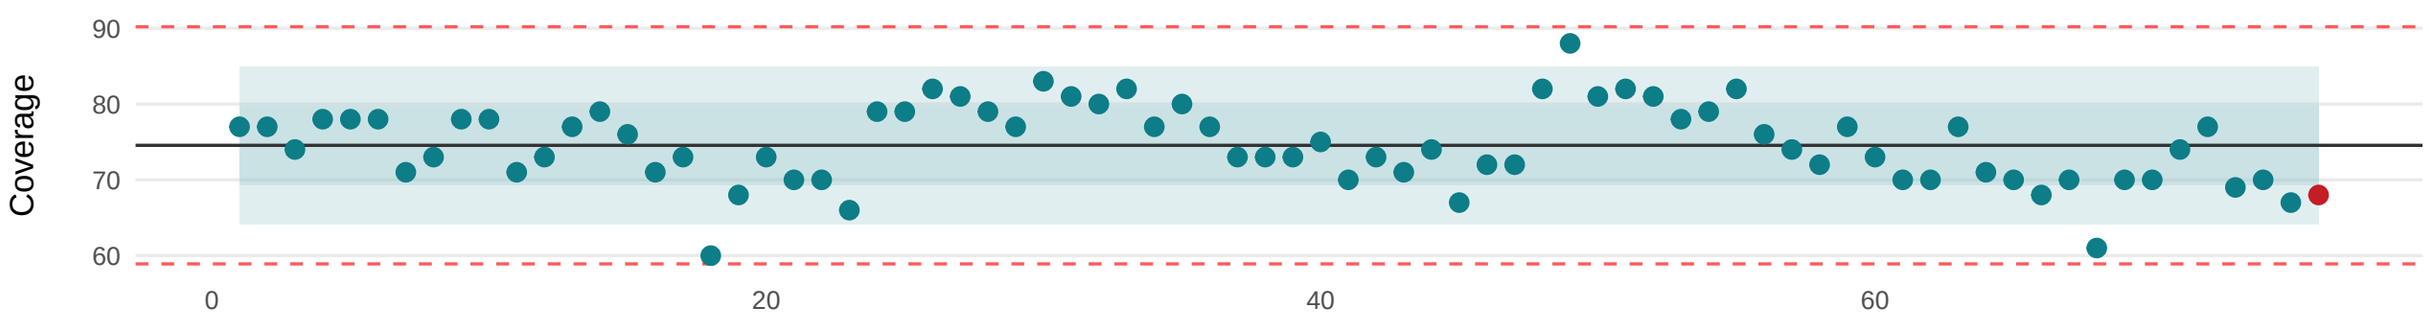

Coverage over runs

Thin gray line = LOESS smooth (trend)

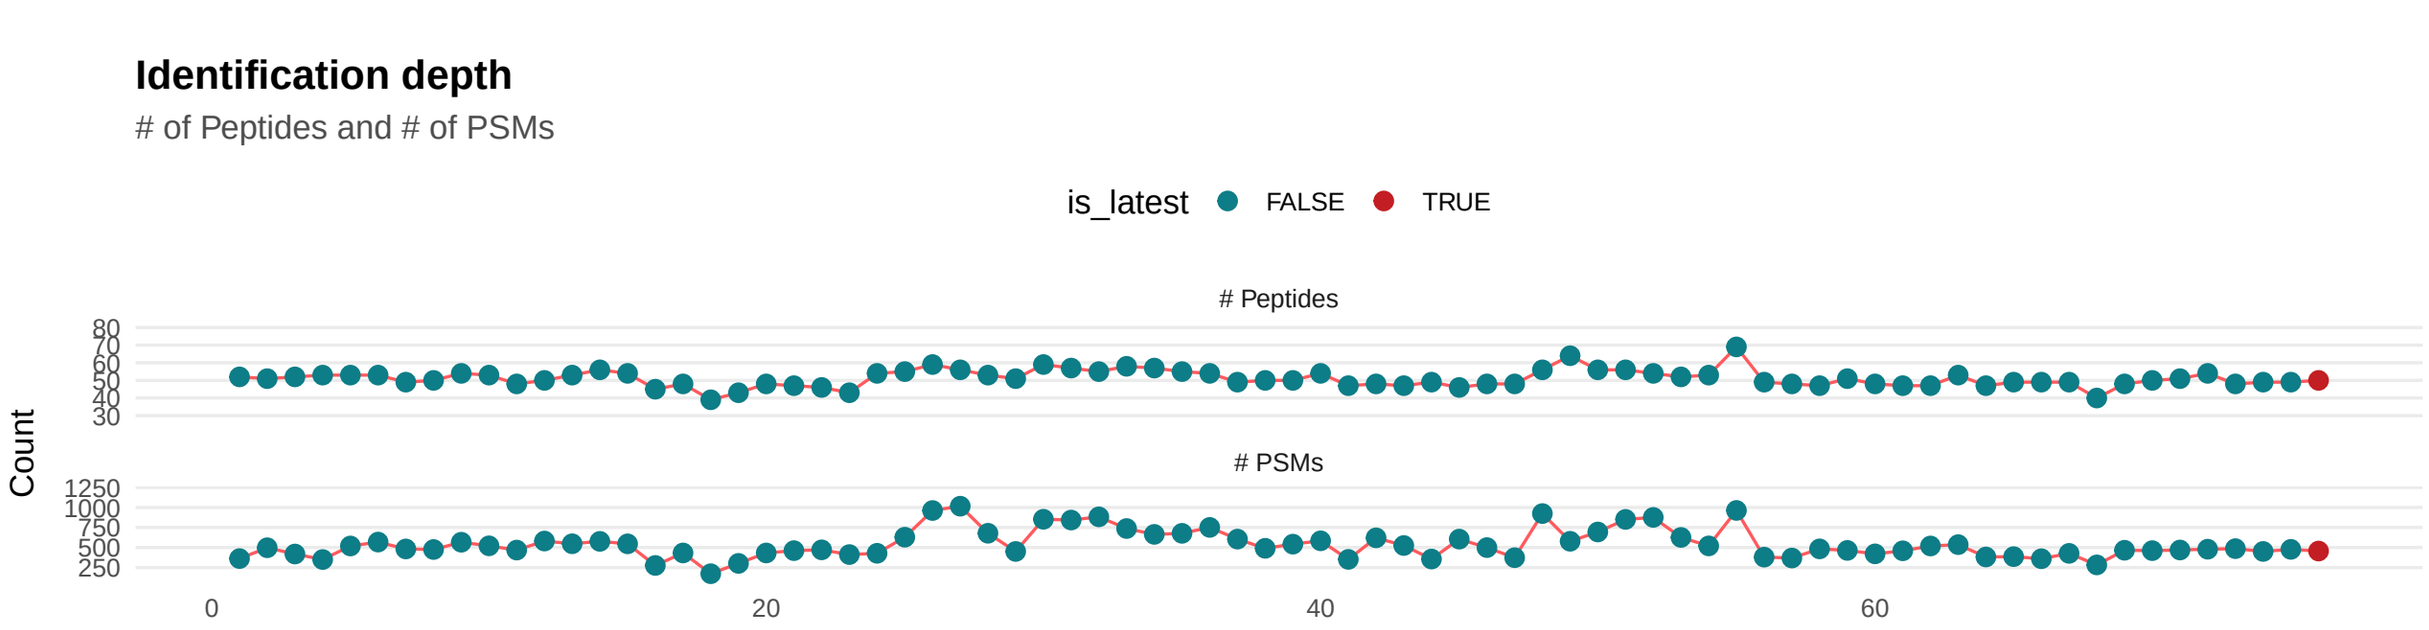

Coverage control chart

Shaded = ±1/±2 SD; dashed red = ±3 SD; solid gray = mean

Identification depth

of Peptides and # of PSMs

Score over runs
