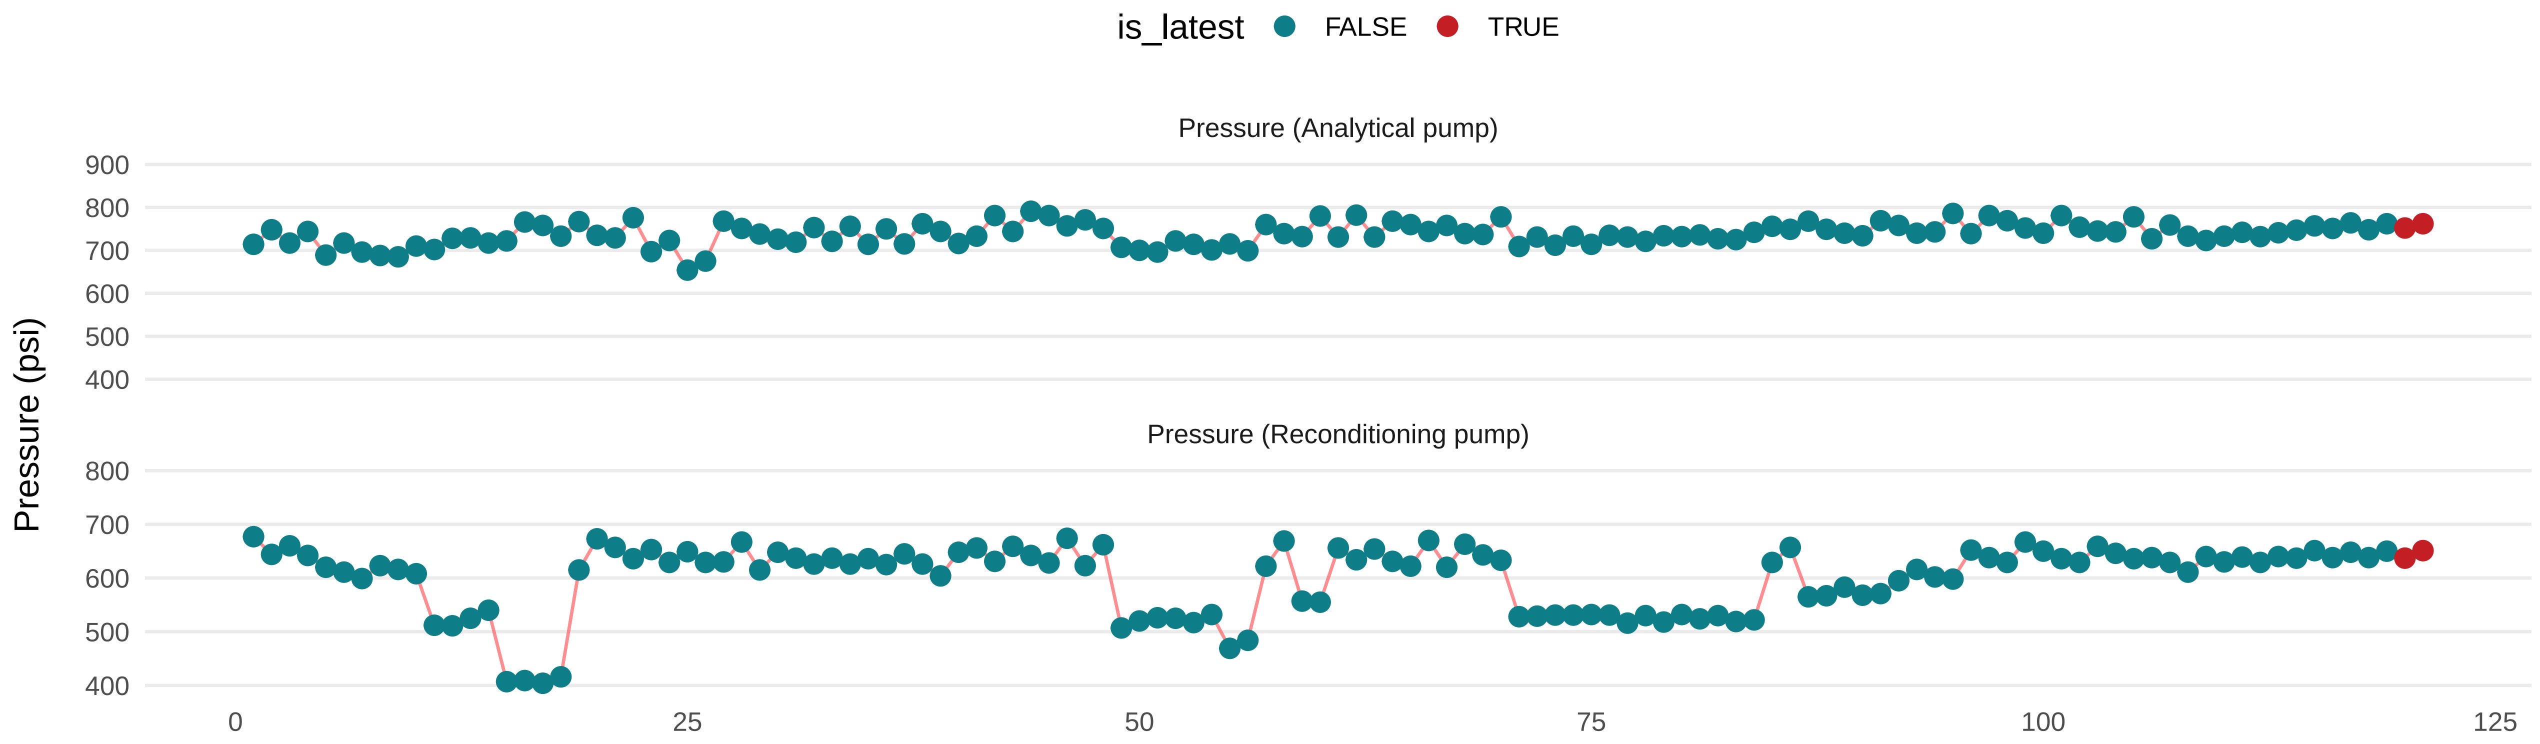
QE QC Dashboard — BSA110226

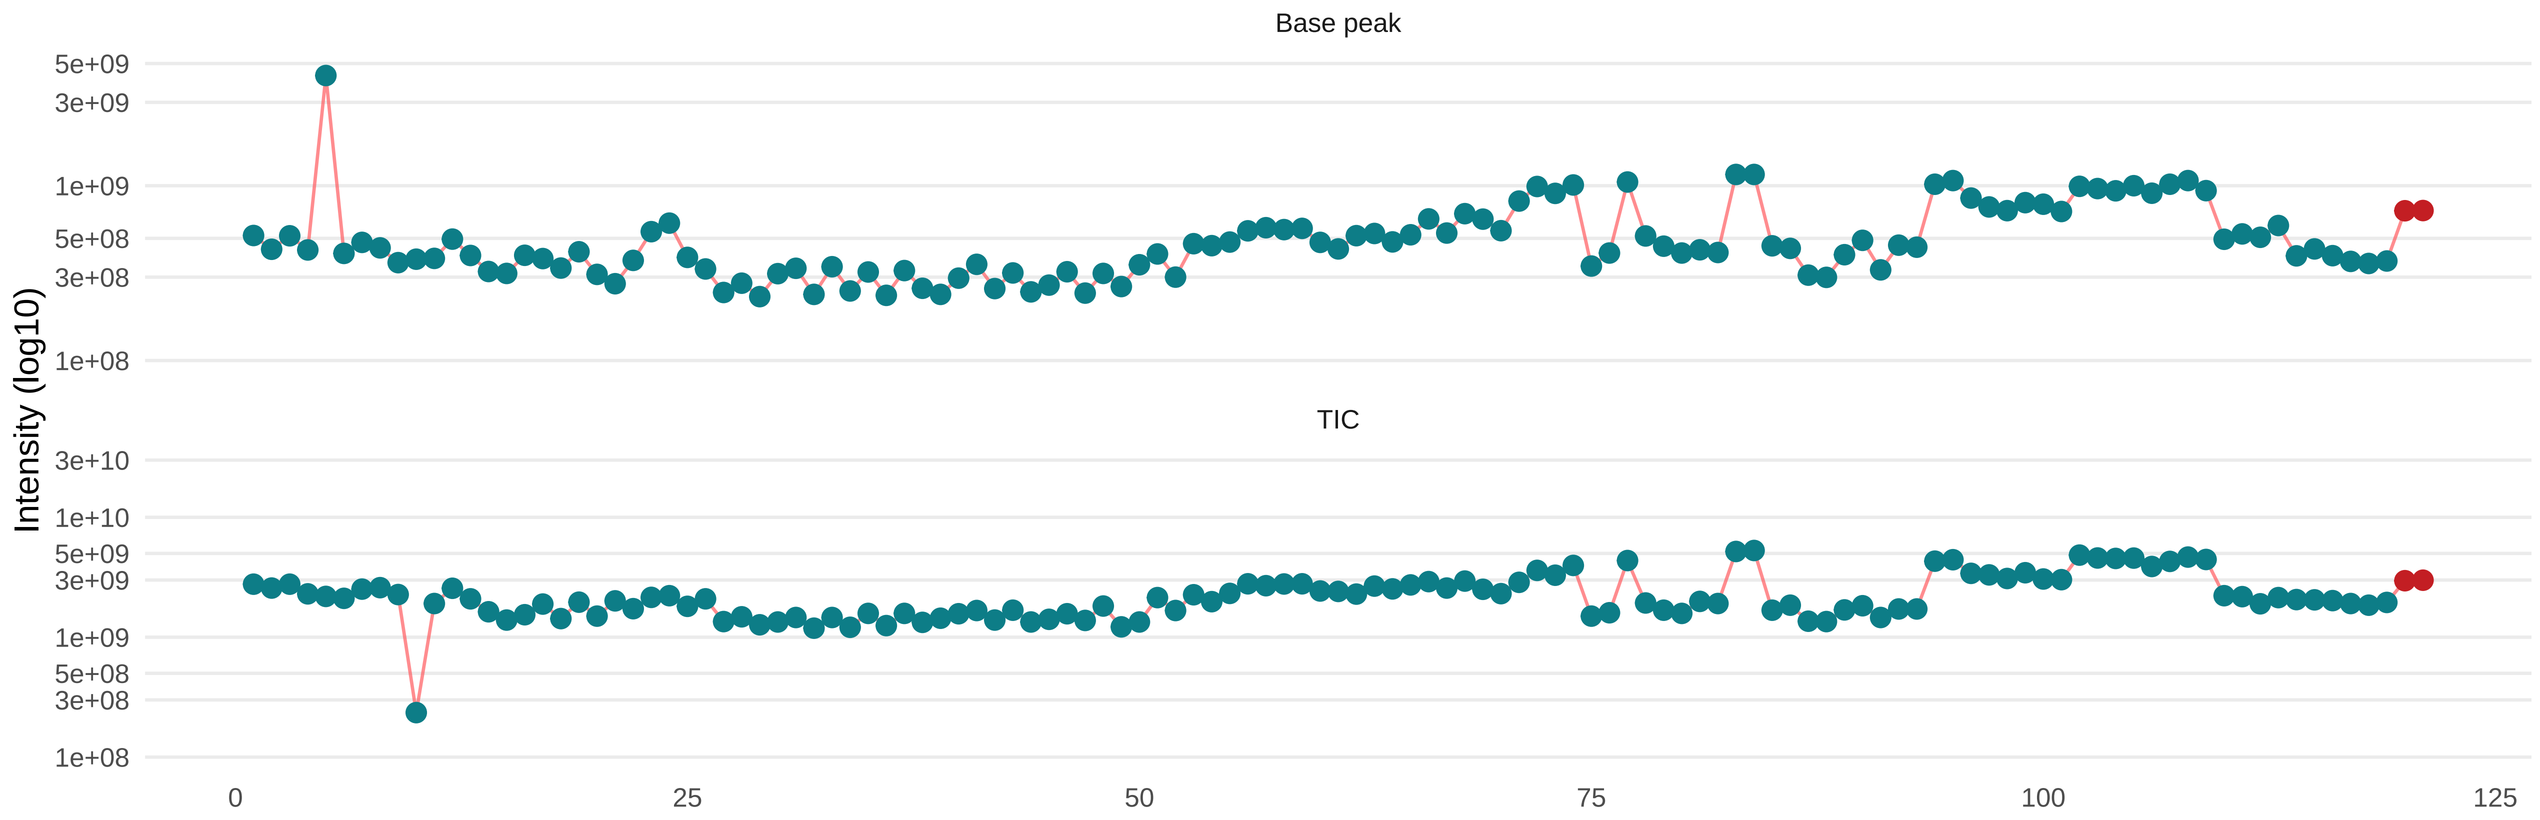
Pump pressure

Tracks LC health (clogs, leaks, column changes)



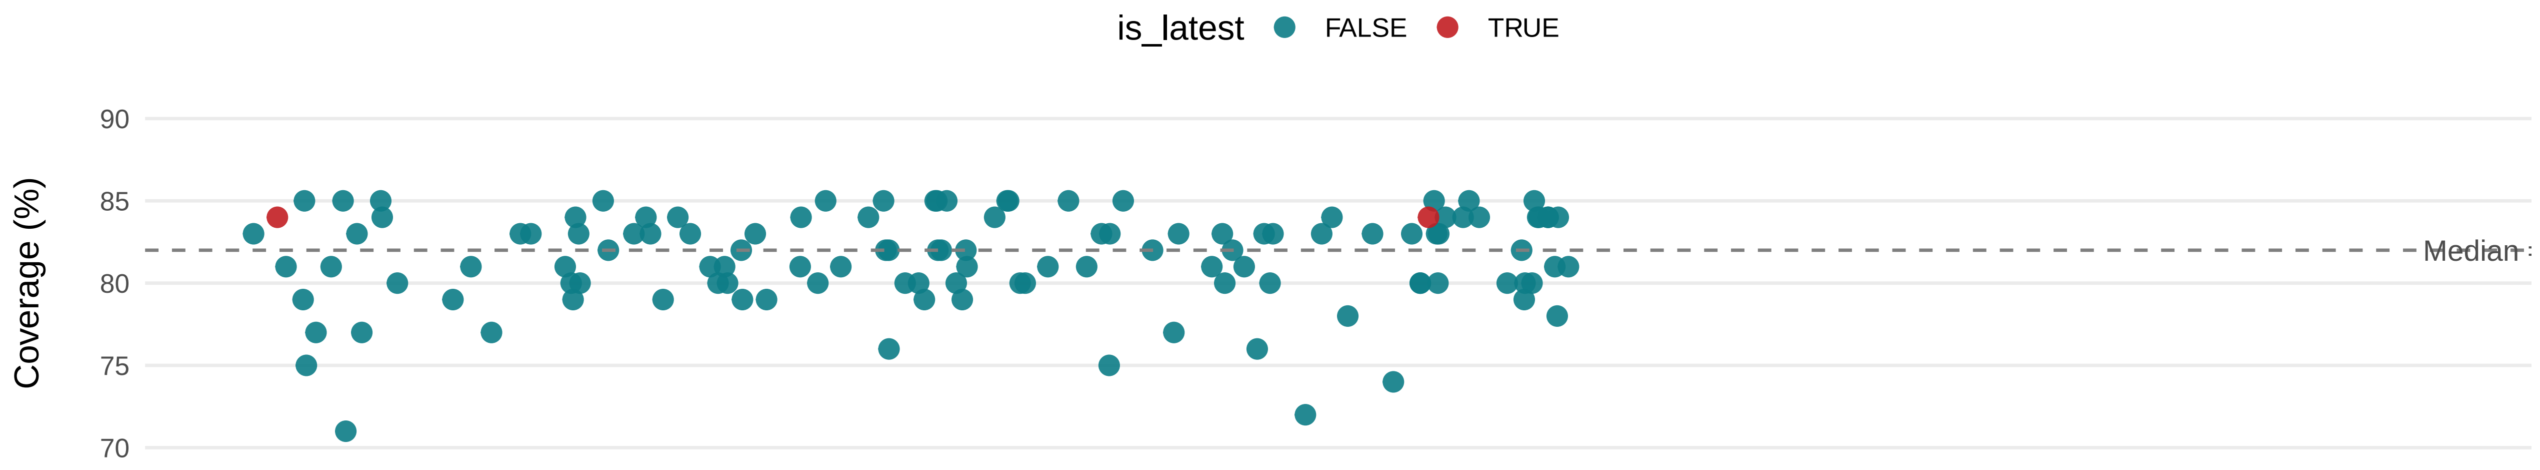
Signal stability (log scale)

TIC and Base peak



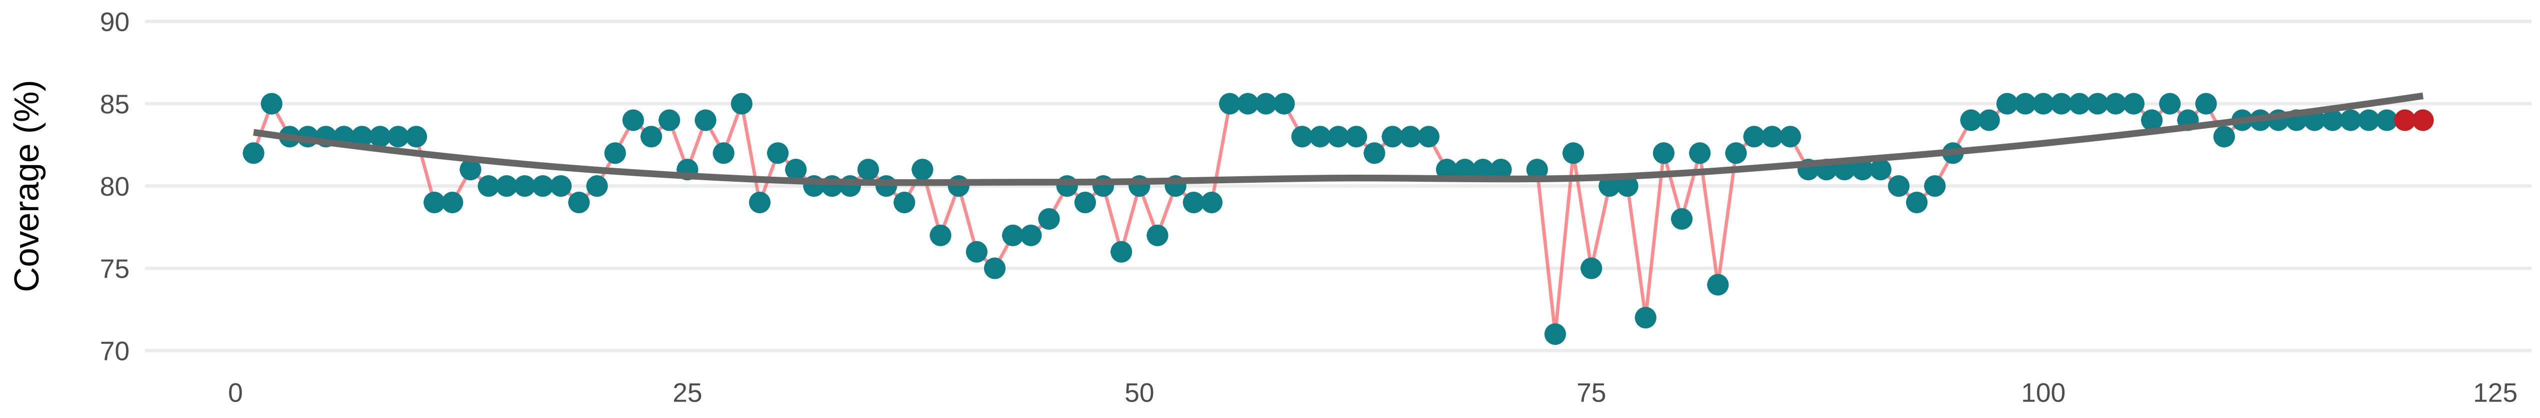
% Coverage (single−column dot plot)

Latest run highlighted; dashed = historical median



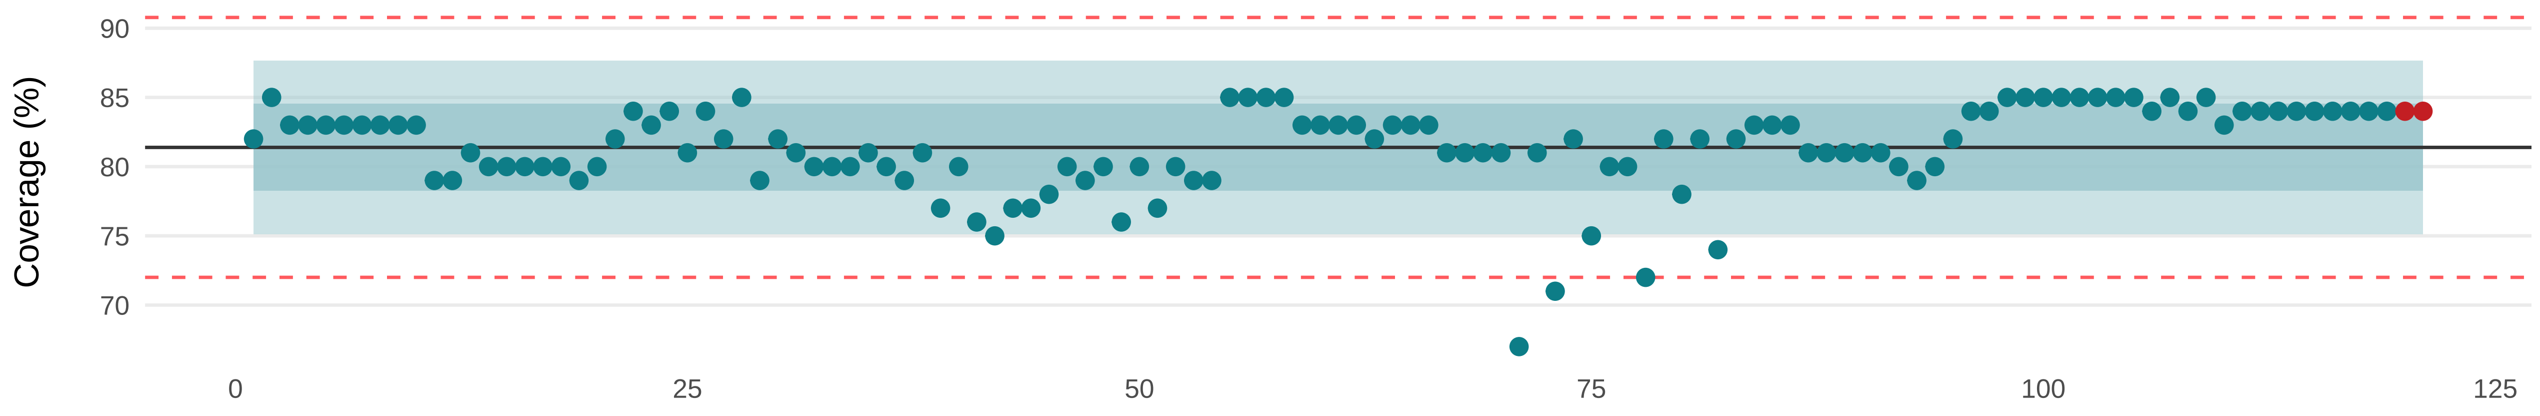
% Coverage over runs

Gray = LOESS smooth



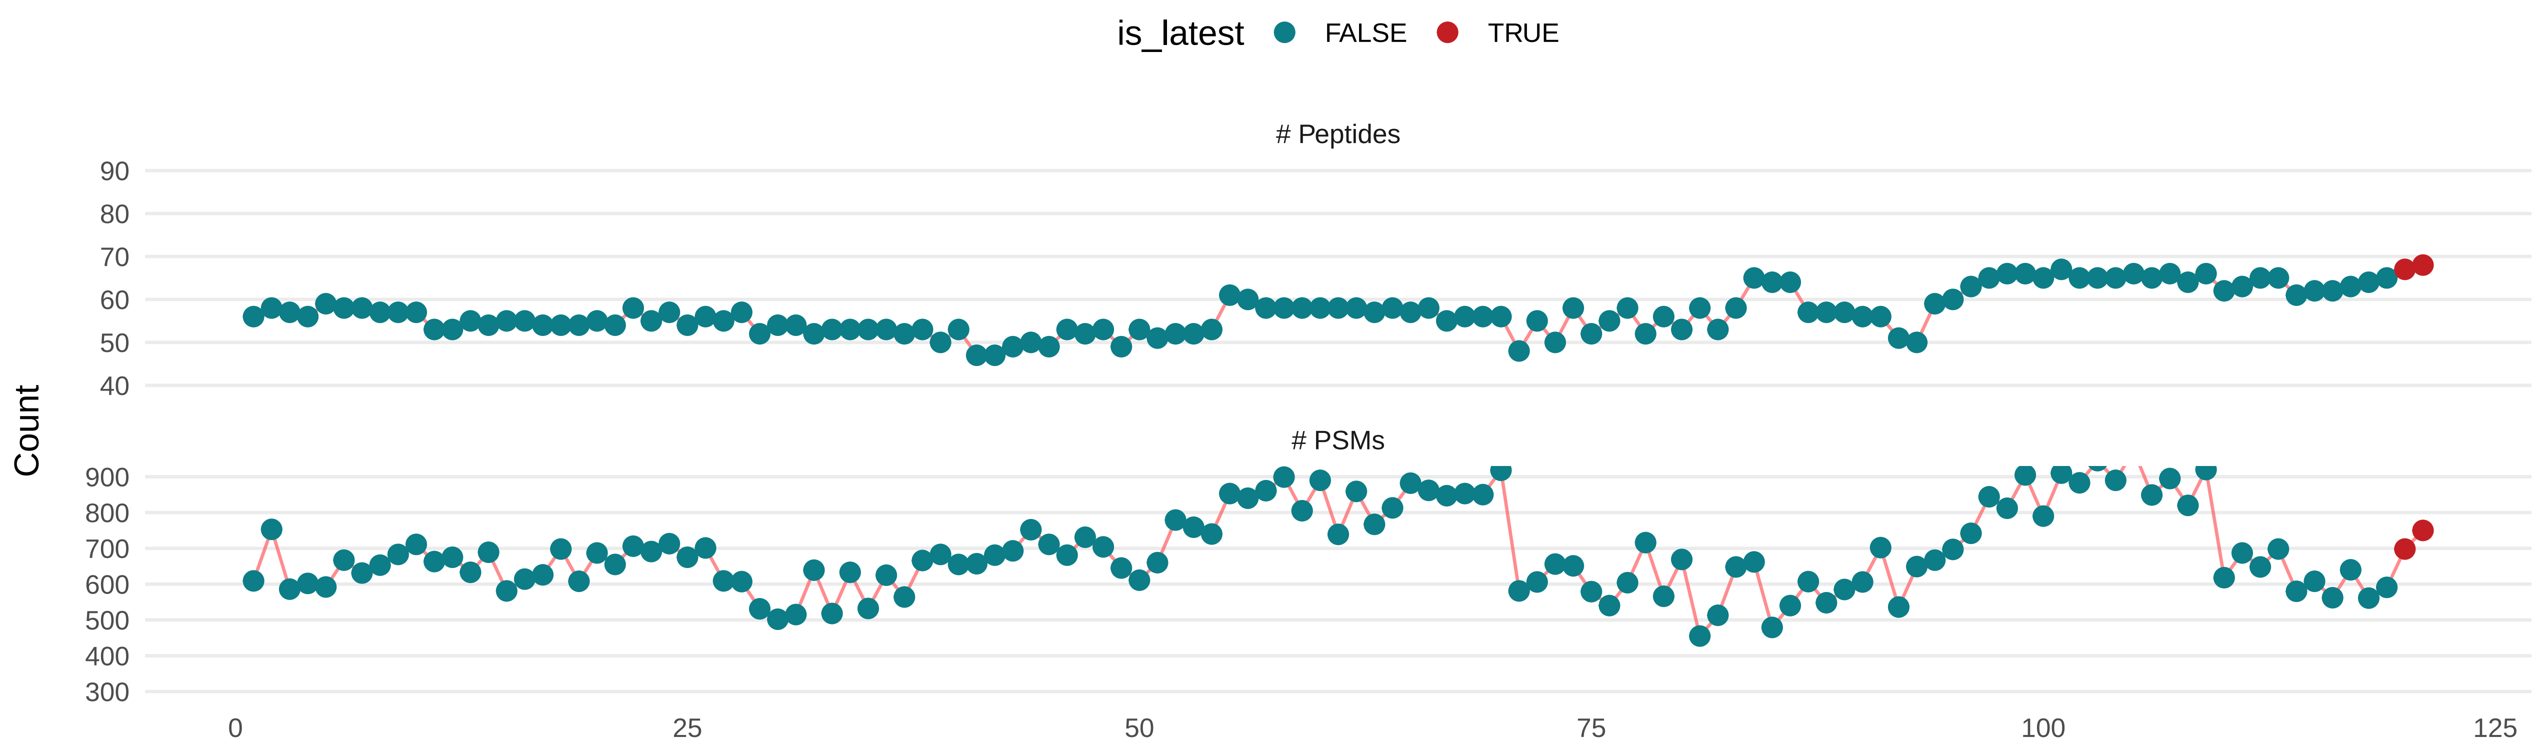
Coverage control chart

Shaded = ±1/±2 SD; dashed red = ±3 SD; solid gray = mean



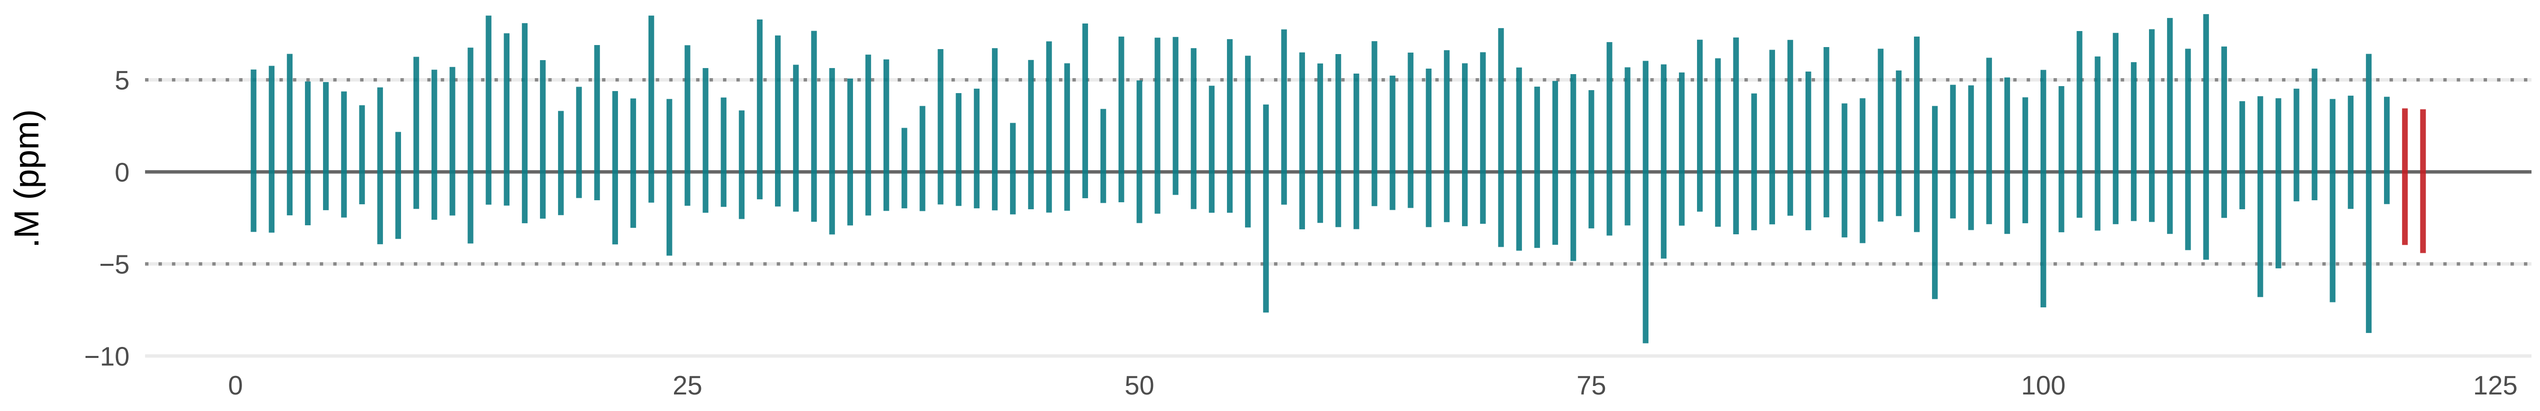
Identification depth

# Peptides and # PSMs



Mass accuracy window

Vertical line spans lower to higher .M (ppm); dotted = ±5 ppm guide



Score over runs
